

COVID-19 VIRUS: QUARANTINE

Englisch / English

INSTRUCTIONS FOR QUARANTINE COMPLIANCE

The Covid-19 virus is extremely infectious. It is most important that the quarantine is respected. It is the only way to stop the virus from spreading.

The Health Authority decides who has to be quarantined and for how long.

The Health Authority will tell you when the quarantine period is over.

Who has to go into quarantine?

- People who are infected with the Covid-19 virus.
- People who have had *close contact* to someone infected with the Covid-19 virus.
- People who arrive in Germany from a risk area abroad.

What does quarantine mean?

- I am **not** allowed to leave my home.
- I am **not** allowed to meet any other people or friends.
- I am **not** allowed to go to school or kindergarten.
- I am **not** allowed to go shopping or go to work (working from home is possible in quarantine, as long as I am not ill).
- I am **not** allowed to bring out the rubbish or go to my letterbox.

When **one person in a household has Covid-19**, then **the other people living with them are also in quarantine**. A household is all the people living together in the same house or flat.

If only one person has had **close contact** to a person with the virus, then only this contact person has to go into quarantine. The people who live in a house or flat with this contact person, on the other hand, do **not** need to go into quarantine.

What does it mean for my family or the people who live with me if I am in quarantine?

The hygiene rules must be followed very carefully:

- **Wash your hands regularly and thoroughly**, for at least 20 seconds.
- **Cough and sneeze into the crook of your elbow**.
- **Let in plenty of fresh air**: open windows for a few minutes several times a day.
- A **minimum social distance of 1.5m** must be kept wherever possible and everyone should wear a **mask**.

If one person (or several people) in a household **are ill with Covid-19**, the following **additional** rules apply:

- **Wherever possible**, all other people should **not be in the same room with the sick person**.
- **Have as little contact as possible with the healthy people** in the household.
- **The sick person should only be supported as required by a few, and always the same, members of the household**.

The **obligation to quarantine** remains in force, **even if these rules are adhered to!** You may be subject to a fine if the rules are not observed. If your behaviour spreads the virus or the disease, you could face a fine or imprisonment.

How will I be cared for when I am in quarantine?

If you are not allowed to leave your home, ask family, friends or neighbours to buy food for you and lay out the money. Your helpers should leave the shopping in front of your door, so there is no contact during the handover.

If no-one from your circle of friends and neighbours can help you, the **voluntary agencies in Hamburg** will help, at: www.freiwillig.hamburg/corona-nachbarschaftshilfe-hamburg or by phone at 040/69 64 67 228.

If you have Covid-19 and **feel ill**, then phone your **GP or the medical call centre** at 116117. Call 112 in cases of **extreme emergency**.

Further information:

Should you have any further questions about Covid-19, you can use the **Covid-19 hotline of the City of Hamburg** at: 040/4 28 28 4000.

The Health Authority will contact the infected person and their close contacts, following a positive test result. This may take a little time if many people are ill with Covid-19. If you already know that you have had close contact with an infected person, please stay at home until the Health Authority calls.

Please help proactively if you have had a positive test result. Use the Covid-19 warning app and inform the people who have been in close contact with you. You can then put yourself in quarantine and protect other people that way.
