Information sheet for parents concerning a head lice infestation in the facility

Dear Parents,

Cases of head lice have appeared in the immediate vicinity of your child in our facility. If a child or adolescent is found to have a head lice infestation, the parent or guardian shall be responsible for performing the necessary treatment and monitoring measures. You must, therefore, examine your child thoroughly and apply the appropriate treatments as necessary. In addition thereto, parents shall be obligated under Section 34 (5) Infection Protection Act (IfSG) to notify their respective community facility of any head lice infestation they have observed, even after treatment.

Your co-operation is essential in containing head lice infestations!

A translation of this letter and all important information on the subject of head lice infestation can be found here in various languages:

www.hamburg.de/laeuse

A thorough examination of your child's head and, if necessary, treatment, are absolutely essential, in order to gain full control of the situation! Please complete the form and return it to us immediately.

Many thanks!

The management team

Please separate here and hand in at the kindergarten / school or similar facility

Declaration by the child's parents/guardians:

.....
Class / Group:

-
- I have examined my child's head and found no trace of lice or nits.
 - I have examined my child's head, found traces of lice / nits and have treated their scalp as prescribed with a product recommended by the Robert Koch Institute (RKI) in accordance with Section 18 IfSG. I also examined the contact persons in my household and treated them as needed.
 - I have removed lice and nits from everyday objects
 - I have informed contact persons who may have been infected in my household
 - I assure you that I will regularly check the scalps of infested family members for lice and nits over the next few days and weeks, and carry out a second round of treatment after 8 to 10 days (depending on the product).
