JOB CAREER

IN HEALTH CARE

PROSPECTS FOR
REFUGEES

What can we offer you?

We support refugees in Hamburg by opening access to a training in health care and nursing.

There is a variety of interesting occupational fields, which offer excellent prospects for a long-term and safe job.

Professions in health care and nursing have future.

Health care and nursing are carried out in Germany in

- hospitals
- nursing homes
- in private homes by outpatient services

We will be glad to inform you in detail on job descriptions.

Who can participate?

The project is directed to refugees in Hamburg, who show genuine interest in health care and nursing work.

For interested persons we can find internships, job shadowing and vocational training in nursing and health care areas.

We give support on the way towards a vocational training in

- health care and nursing assistance
- old-age care or
- health and patient care.

Knowledge of the German language is required. Required language knowledge differs depending on whether the aim is job shadowing, or an internship or a vocational training. Interested persons need to be healthy and fit for the job.

Are you interested? Your next step....

Please contact us

- Come and see us in our open consultation hours
on Tuesdays 10-12 hrs.
- Send us an e-mail or
- call us: 040/428 37-2025

We advise you

Together we will develop your personal path to a job in health care. First we look at your interests and skills. Then we seek prospects for starting training in the area of health care/nursing with the aim of providing a long-term employment for you.

A first vocational orientation includes an internship or training with accompanying job-specific language classes. Together with you we look out for options.

We support you

once you are on job shadowing, or during the internship, or while being on training.
