

**HAMBURG – THE AVIATION REGION:  
EXPERTISE FROM FRONT TO REAR**

**The city where planes are born**

The A320neo is manufactured in, maintained in, and was even first-scheduled into Hamburg. It has become the best-selling airliner in the world. And as 50% of all A320 family aircraft are being assembled at the **Airbus** Finkenwerder site, they are one of the reasons that Hamburg today is the world's 3rd largest site for civil aviation. Look at any Airbus jet, and you are looking at the Hamburg Metropolitan Region: Airbus tails are being manufactured in Stade, west of Hamburg. Stade's "CFK Valley" is also one of the leading sites for composite technology and a pillar in the development and production of the A350. And, last but not least, Hamburg is one of the two A380 delivery centers.

**Ground expertise since 1911**

Air transport systems are among our traditional competencies. **Hamburg Airport** has been in operation for over 100 years. Today, it is Germany's 5th largest international airport and the largest in the North. Its 16 million passengers per year stem from a catchment area from the city center well into Denmark.

**Hamburg keeps you flying**

Hamburg is home to the world leader for maintenance, repair and overhaul of aircraft: **Lufthansa Technik**. And when it comes to VIP modification or award-winning ideas for passenger comfort, LH Technik will also be your port of call.

**Hometown of passenger experience**

Whether it is the overall design, the lavatory or the lighting concept: Hamburg has a unique expertise for aircraft cabins. It is shown every year at the **Aircraft Interiors Expo**, where also the leading award of aircraft cabins is presented, the **Crystal Cabin Award** – initiated by Hamburg Aviation.

**Printing new ideas**

Whether it is inkjet printing to fuselages, flight acoustics, virtual reality engineering or the "smart factory": tomorrow's concepts of the aviation industry are being tried out at the high-end infrastructures of **ZAL** – one of the world's leading hubs for applied aeronautical research.

**Always looking ahead**

The Hamburg Metropolitan Region is piloted by an experienced crew, operating on all levels of flight: there is **Hamburg Aviation** as the global network for the local community. There are four universities and the **Hamburg Centre of Aviation Training (HCAT)**, offering world-class education. And there are **Hanse-Aerospace** and **HECAS**, giving thrust to the suppliers and service providers.

**HAMBURG AVIATION**
